

# Effective mass

What you  
histogram:

$$M_{\text{eff}} = \mathbf{p}_T^{\text{missing}} + \sum_i \left| \mathbf{p}_T^{\text{jet}_i} \right|$$

You look for **position**  
**of this peak** and call  
it **MeffPeak**

Call it Meff and Mest too  
(just to confuse people!)
