

# Moral

- Remember our variables are always limited by what we feed them
  - (garbage in garbage out)
- May need alter variable in light of pathologies
  - Try to locate the subsystem that lacks ISR/FSR, e.g. by using reconstructed objects with pt thresholds
  - This takes away  $u_T=0$  requirement, and gets us back to  $M_{1T}$  (a.k.a. “subsystem root s hat min”)
