

## **All Quarks are Happy**

A: I cannot help but wonder why on earth

B: physicists named only three quarks joyful.

B: Why not other words that are respectful?

A: What are we to name quarks that were since birth

A: of cosmos. What rude names we have set forth,

B: for particles that are most wonderful.

B: There is no need to remain sorrowful,

A: as flavours do not determine your worth.

C : Down quarks make protons and neutrons come true,

D : strange quarks are quite extraordinary,

D : bottom quarks shine with beauty like fairy.

C : Hence these quarks deserve a happy name, too.

D : Since all of the quarks are necessary,

D : we should remember "All quarks are merry!"
